SUMMARY

Dynamic and detail-oriented student specializing in AI and Machine Learning with a strong foundation in programming and project-based learning. Eager to contribute innovative solutions to the field of Artificial Intelligence through dedicated teamwork and continuous learning.

EDUCATION

Bachelor of Technology – Computer Science and Engineering 2022 – 2027
[Bharati Vidyapeeth's College of Engineering] New Delhi, India

- **Relevant Coursework**: Neural Networks, Computer Vision, Natural Language Processing, Databases, Algorithms

PROJECTS

Phishing URL Detector | *PyTorch, ONNX, INT8 Quantization* 2025 – 2026

- Trained transformer-based models (15M–100M params) for phishing URL detection; achieved **97%+ accuracy**
- Applied INT8 quantization reducing model size by **4**$\times$ with $<$0.5% accuracy drop; deployed via ONNX runtime
- Benchmarked inference latency and performed statistical validation (Brier scores, McNemar's test, t-tests)

Depression Detection from Social Media | *ModernBERT, HuggingFace, PyTorch* 2024 – 2025

- Fine-tuned ModernBERT-large on 50k Reddit posts; achieved **state-of-the-art F1-score** on DD-Kaggle benchmark
- Conducted K-fold cross-validation, ablation studies, and robustness testing under real-world class imbalance
- Published findings; performed comparative analysis against BERT, RoBERTa, and other transformer baselines

AI Agent Framework | *Python, LLM APIs, Tool Use* 2024

- Built an agentic pipeline with tool-calling capabilities for autonomous task decomposition and execution
- Integrated HuggingFace models with custom retrieval-augmented generation (RAG) for knowledge-grounded responses

SKILLS

Programming : Python (NumPy, Pandas, PyTorch, Transformers), MySQL, CUDA
Tools & Platforms : Git, Jupyter Notebook, HuggingFace, ONNX, Quantization, Docker
AI/ML Expertise : Neural Networks, Computer Vision, NLP, Transformers, LLM Fine-Tuning, AI Agents
Soft Skills : Problem-Solving, Communication, Team Collaboration
